

ANNUAL REPORT

INDUSTRY LEADING PROVIDER OF LPG AND PETROCHEMICAL TONNAGE.

2014

From the CEO

2014 will go down in history as the best year ever for the bigger LPG vessels. That being said, 2015 could end up in the same area, or even better. The main reason for the very tight shipping market is the new LPG export volumes coming out of USA, a product of the rapidly increasing shale gas and shale oil production. Along with the exponentially growing export from USA, the traditional existing large LPG exporters have all contributed with stable high volumes. Also, with price differences between regions, additional arbitrage has been available, resulting in additional long haul LPG voyages from West to East. At the same time, very few new ships have been delivered in the period 2010-2013, largely because ordering stopped for an extended period following the financial crises in 2008.

With this record high LPG market, Solvang also had the best year ever in terms of earnings from the shipping activities. And although Solvang is not mainly focused on the spot marked, there were significant improvements on the existing marked-based contracts as well as new improved contracts. Contracts where the specialized niche market ships currently in our fleet were able to differentiate further and

capitalize on the strong market.

With this record strong VLGC market, there is of course a strong interest for existing and new players to increase their exposure in this segment. The result is that the current orderbook stand at well over 50% of the existing fleet, and a significant part of these ships will enter the market towards the end of 2015 and during the first half of 2016. And even though there is potentially a balance in the market between new vessels and increased LPG exports, the volume of vessels will have a disruptive effect and we expect even higher volatility in the VLGC market.

In the midst of the very exciting and challenging times, I am very proud of what we have achieved. We have a stable operation and technical management, with little or no turnover onshore. We have a robust organization, able to handle growth and to tackle any technical issue without using external expertise. With the very tight shipping market and a large new-build fleet in order, there is a lot of pressure on keeping our sailing crew as well as office staff. We have so far been able to keep a very high retention rate. We will continue focusing on making sure it

stays high by developing and empowering all our crew and staff, and helping them progress in their carreers.

In 2014 we deliver better results than ever before in terms of safety, with zero LTI or other serious incidents, in terms of quality with very impressive vetting statistics, in terms of employee satisfaction, and in earnings and cost control. I really want to take this opportunity to thank all our employees for a job very well done, and to encourage all of you to keep trying harder and develop even further. Quality is our key differentiator.

2014 was the first full year with the two new VLGC delivered mid-year and end of 2013. These state-of-the-art vessels were the first of its kind with fully integrated exhaust gas cleaning equipment. The first vessel was delivered in June 2013, but it was not until February 2014 it was fully approved and certified to operate on heavy fuel oil within the Emission Control Areas (ECA). It was a long process, mainly due to the fact that it had not been done before, and the tests had to be developed and agreed upon before the final approval was there. Since then the

approval process has been a lot smoother, and ship number two only took about a month. The equipment is working very well, and way below the ECA regulations in terms of discharge to air and sea. Furthermore there has been next to no downtime or technical issues.

In 2015 we will take delivery of three new LGC vessels from Hyundai Heavy Industries in South Korea. These are vessels designed and purpose built to fit a certain niche segment within the gas segment, and represent yet another great step towards the future in terms of fuel efficiency and emission control. There has been a lot of interest in our new vessels and I am happy to say that they will all start their life in a good market and with excellent timing.

Solvang ASA has a strong position, both in the market place and in terms of financial strength. The future looks good, and there will be several growth opportunities for Solvang to participate in. We will continue to focus on excellence in operating our ships, and always giving our customers high quality servicedelivery.

Definitions

Ammonia / NH3 Used as raw material for fertilizer production.

Cbm Cubic meter. The most common capacity nomination for gas

vessels.

CoA Contract of Affrightment. A CoA is an agreement between

ship owner and customer for the transportation of a min-max volume of cargo at a given rate per ton, normally for one or

several years.

Dry docking Normally related to a vessels periodic maintenance according

to class requirements. The intervals are normally 5 years for

newer vessels.

FFJV Fully Fledge Joint Venture.

Freight rate The rate paid by customer to owners for the transportation

service provided. Calculated either per ton basis or per days

basis.

HSEQ Health, safety, environment and quality.

IFRS International Financial Reporting Standards. All Norwegian

companies quoted at the Oslo Stock Exchange are required

to follow this accounting standard.

IGC International Gas Carriers AS. Marketing company for

Solvang's vessels.

KPI Key Performance Indicators. Key figures.

Large Gas Carrier. LPG vessels between 50.000 cbm and

70.000 cbm. Normal size for newer vessels is 60.000.

LIBOR London Interbank Offered Rate.

LPG Liquefied Petroleum Gas.

Lost Time Incident Ratio measuring the level of injuries in a

company or an operation.

Panamax VLGC Very Large Gas Carrier with a beam of 32,2 meter enabling

the vessels to trade through the Panama canal.

Petrochemical Gases Gases used as input/feedstock in petrochemical industry.

Semiref/Ethylene vessel A gas carrier capable of transporting cargoes both under high

pressure and with full refrigeration.

Spot rate

The rate obtained when chartering out a vessel for a single

voyage.

TC Time Charter. A contract between ship owner and customer

for anything between 2 months and several years. All voyage cost such as bunkers, canal and harbour fees are payable by the customer. Operating Cost is for the owner's account.

VLGC Very Large Gas Carrier. LPG carriers with over 75,000 cbm

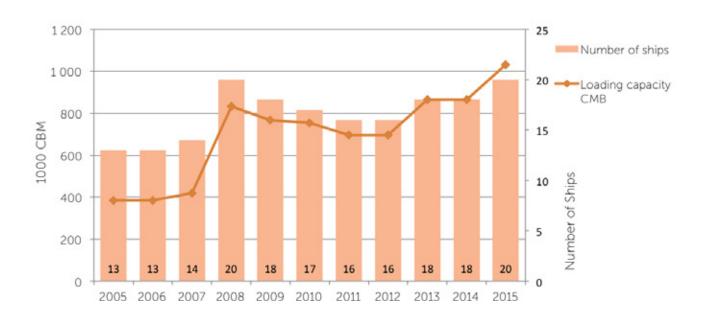

load capacity The normal size for modern vessels is 82,000 cbm. As opposed to Panamax VLGC, these vessels cannot sail

through the Panama Canal.

Market Analysis

VLGC

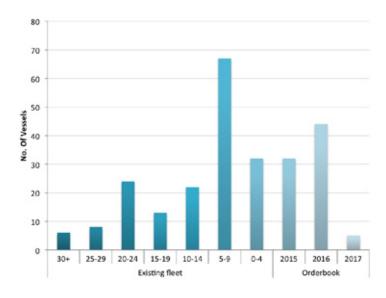

2014 was yet another year in the limelight for the VLGCs, with all-time high rates, volatility and record high ordering activity. This year as last year, increased US export capacity was the driver for both freight rates and ordering activity.

Freight rates started the year in a negative trend, however, from a higher base than the former years. The negative trend reached its trough at the end of February before it went on a rapidly increasing trend, supported by increased US export volumes, west-east arbitrage movement, and high Indian spot demand combined with congestions in Indian ports. The Baltic peaked at an all-time high of USD 137.5 per metric ton (pmt) at the end of April, which equals about USD 3.7 million per month on time charter equivalent (TCE), before it trended down and reached a trough of USD 78.19 pmt (USD 1.7 million TCE) towards the end of May. Supported by the seasonal summer market, the Baltic reached a new all-time high of USD 143.25 in mid-July (USD 4 million TCE). For the reminder of the year, freight rates were on a downward slope. Nevertheless, the Baltic didn't fall lower than USD 64.81 pmt (USD 1.65 million TCE), which must be considered a very healthy level.

8 VLGCs were delivered in 2014, while no vessels were scrapped. The orderbook expanded by a record number of 42 new vessels. 7 orders were placed at Japanese yards, three at Jiangan in China, with the remaining 32 in Korea, including 12 orders by Chinese interests. Ordering interest for new VLGCs slowed down towards the end of the year.

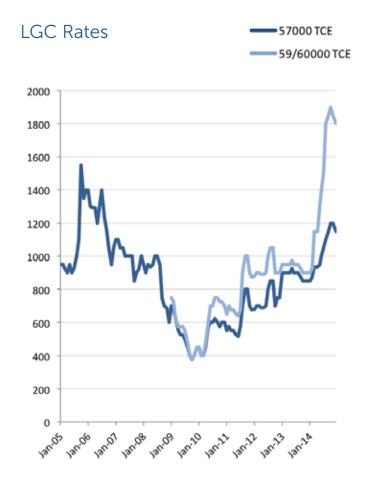

VLGC Age

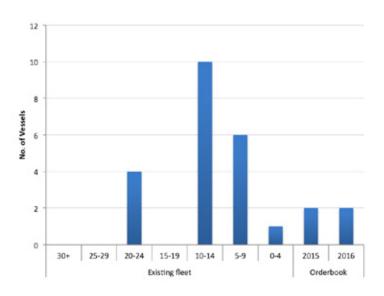

LGC

The LGC segment performed very well in 2014 as freight rates boomed together with the strong VLGC market. The LPG market was to an increasing degree the demand driver this year, with LPG arbitrage conditions making larger LPG tonnage high in demand. Towards the end of 2014, only 5 LGCs were trading ammonia. Most vessels were committed on time charter or own program.

No vessels were scrapped or delivered to the fleet of 20 vessels during 2014. For the second year in a row, Solvang was the only owner placing new orders, adding Hull 2710 to the orderbook, which at the end of 2014 contained three vessels.

LGC Age

Ethylen/semi-ref

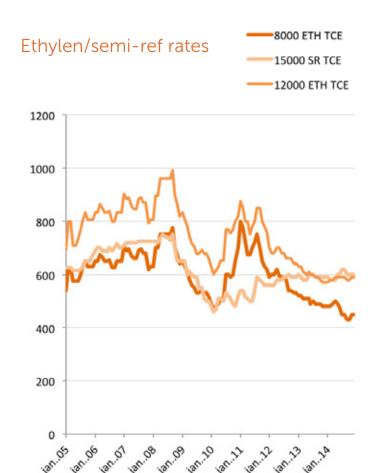

Rates were relatively stable through the year, with the established premium for larger tonnage continuing around last years' levels. In 2014 as in 2013, Iranian ethylene export remained very limited, even with the limited sanction relief, which allowed Iran to export petrochemicals. The negotiations towards a final deal were extended to an end June 2015 deadline. In April 2015, an agreement for a framework for a final deal was negotiated, which gives optimism for an eventually increase in the Iranian export numbers. However, the final deal is still not signed and the Iranian oil and gas as well as petrochemical sector is suffering after years of underinvestment and sanctions, so the effect on the ethylene and semi-ref market will take time to materialize.

Middle East Gulf ethylene exports were at low numbers, around the 2013 level of 800,000 tons. The main reason for low exports was low Iran and Saudi volumes. The year started on a slow note, with very little export from Saudi Arabia and Iran in the first half of the year. In the second half of the year, Saudi export picked up and UAE export increased from already healthy numbers due to a new steam cracker in Abu Dhabi.

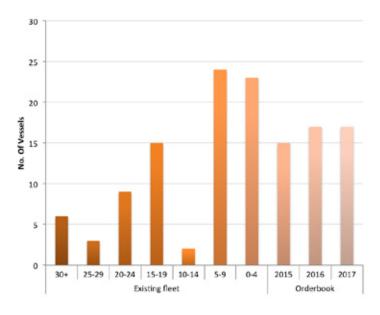

Open west-east arbitrage window for ethylene paved the way for unusual long haul volumes from Europe and South America to Asia. In the opposite direction, the east-west arbitrage window for propylene and especially C4s gave long haul employment for the fleet.

High trans-Atlantic LPG activity during the year gave employment, especially for larger vessels and contributed to keeping rates at decent levels. We expect LPG trade to be an increasing part of the handysize trade, with added volumes from the US and Ust Luga.

During 2014 13 vessels were delivered, and 9 were scrapped. The orderbook expanded rapidly in 2014 with 20 vessels in the in the 21-22.000 cbm range, and in addition, 16 larger ethylene vessels (up to 6x87,000 cbm) were ordered for dedicated ethane trade. The trend in the orderbook is clearly a move towards larger sizes, with ordering of larger tonnage and scrapping of smaller tonnage.

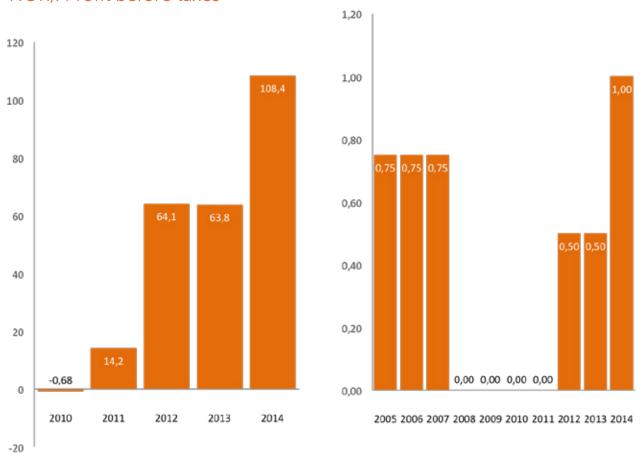

12 000 - 23 499 cbm Ethylen/semi-ref age

Annual Report 2014

Profit developement 2010-2014(mill. NOK). Profit before taxes

Dividend per share 2005-2014

1. INTRODUCTION

2014 was a very good year for the larger LPG ships. A VLGC (Very Large Gas Carrier) market with a monthly average far above the historical peaks, along with a very tight LGC (Large Gas Carrier) market, resulted in Solvang's highest ever earnings from the shipping activities. The ethylene segment showed a slight improvement from 2013, with good arbitrage between west and east, which resulted in long voyages for the larger ethylene ships.

The Group recorded a profit before tax of NOK 108.4 million against NOK 63.8 million in 2013. Positive cash flow was NOK 33.9 million compared to negative NOK 3.9 million in 2013, where the improvement comes mainly from investments in new ships, as well as higher dividends from the ship owning companies in 2014. Tax expense was NOK 5.6 million, and the Group had a profit after tax of NOK 102.8 million against NOK 65.7 million in 2013.

The board of directors propose a dividend for 2014 of NOK 1.00 per share.

2. OPERATIONS

The group's activities are divided in two main segments; Ship-management and Ship-ownership through participation in ship owning companies. The latter segment can be divided into three sub-segments for the transportation of Liquefied Petroleum Gas (LPG), ammonia (NH3) and petrochemical gases:

- 12,000 cbm 17,000 cbm ships (Semirefrigerated / Ethylene)
- 60,000 cbm fully refrigerated LPG ships (LGC)
- 75,000 84,000 cbm fully refrigerated LPG ships (VLGC)

The company's headquarters are located in Stavanger, Norway, where the operation of all the ships are managed from the company's fully integrated shipping organisation.

The chartering is handled by International Gas Carriers (IGC) in Oslo. IGC is a 100% owned subsidiary of Solvang ASA. In addition, the company has a crewing office in Manila, Philippines.

The company sold the oldest ship, "Clipper Skagen" in October 2014, and operates and has ownership by year end in 17 ships. Furthermore, Solvang has ownership in three 60,000 cbm LGC ship, for delivery in the second and third quarter of 2015.

3. MARKET

3.1 Semi-refrigerated / ethylene carriers

This segment includes semi-refrigerated and ethylene carriers from 8,000 cbm and up. The group had seven ships in this segment at the start of 2014, where one was sold in the fourth quarter. Of the remaining 6, 1 is on a long term TC, while the other 5 has been operating in the spot marked and on consecutive voyage contracts.

For these 5 ships 2014 was the first year outside a JV / commercial cooperation within the ethylene segment, and the group had an

upturn in utilization and earnings as a result of a better market, but also as a consequence of being able to freely re-position vessels to other geographical areas, as well as having a broader customer portfolio.

The "Clipper Harald" is on a time charter (TC) until July 2019, and the charterer has an option to extend the contract for an additional eighteen months. This contract was extended by 5 years in 2013, commencing in July 2014, based on "Clipper Harald" retrofitting exhaust gas cleaning equipment (Scrubber) during the fall of 2014, enabling the vessel to comply with new emission regulations from January 2015.

3.2 LGC

This segment is defined as fully refrigerated LPG ships from 59.000 – 60.000 cbm. The fleet consist of 9 ships, where 3 are under construction for delivery in second and third quarter 2015. All ships operate on TC with varying length.

The newbuilds represent a new type of LGC, with a shorter hull to avoid waiting time in certain areas, and there is considerable amount of development done in order to create the most energy efficient vessels possible. Changes including hull shape, propulsion technology, antifouling technology and cargo systems. Furthermore, the newbuilds are the first LGC LPG carriers in the world with fully integrated exhaust gas cleaning system for both the main and auxiliary engines. This means that the ships comply with all existing environmental standards in Emission Control Areas (ECA) from 2015, and the new expected global standards in 2020.

The average earnings on TC basis showed a continuous positive trend with improvements from 2013, where earnings for 2014 was about 2% higher compared to 2013. The positive trend in earnings continues in 2015, where LGC segment are benefiting from positive outlook in LPG, and from favourable changes in trading patterns for Ammonia.

3.3 VLGC

This segment is defined as fully refrigerated LPG ships of 75.000 - 84.000 cbm. Solvang has a total of 5 ships in this segment, two Panamax VLGC ships of 75,000 cbm, one VLGC of 82.000 cbm, and two VLGC ships of 84.000 cbm.

The Panamax VLGC's are purpose built for transporting LPG from the Atlantic Ocean and Gulf of Mexico to the west coast of Central America. As a result of these features, the Panamax VLGC's have achieved better TC earnings than the VLGC fleet in general in 2014. The "Clipper Victory" is on TC to August 2016, while the "Clipper Sirius" is on TC to January 2017.

The 82,000 cbm VLGC "Clipper Sun" is on a TC until September 2016. "Clipper Quito" a 84.000 cbm vessel, is on TC to October 2016, and the "Clipper Posh", a 84.000 cbm vessel, is on TC to December 2018

4. PROFIT

(Figures in parentheses refer to 2013)

Operating income increased significantly from NOK 65.5 million to NOK 80 million, with a full year of VLGC delivered toward the end of 2013, management fee for LGC newbuilds, and additional fees for commercial chartering for Aurora LPG.

The group's result after tax was NOK 102.8 million (NOK 65.7 million). Earnings per share were NOK 4.21 (NOK 2.69). The result for the parent company was NOK 9.1 million (NOK 12.4 million).

4.1 Financial items

The group reported net financial items of NOK 6.9 million (NOK 17.6 million). The corresponding figure for the parent company was a result of NOK 9.7 million (NOK 13.6 million). The group's securities portfolio generated a result of NOK 2.8 million (NOK 14.4 million). The group has during 2014 sold out its entire securities portfolio.

4.2 Liquidity and financial strength

At year-end, the group had liquidity consisting of cash totalling NOK 92.1 million (NOK 72 million). The securities portfolio is now sold, and therefore had a market value of NOK 0 (NOK 13.8 million). The corresponding figure for the parent company was NOK 18.8 million (NOK 21.9 million), of which the securities portfolio amounted to NOK 0 (NOK 13.8 million). Total current assets at year-end was NOK 123.2 million (NOK 144.9 million), while current liabilities totalled NOK 58.8 million (NOK 81.2 million). Long-term liabilities and obligations totalled NOK 30.5 million (NOK 16 million). For the parent company, total current assets at year-end amounted to NOK 35.6 million (NOK 38.6 million), while short-term liabilities totalled NOK 99.5 million (NOK 27.2 million). The parent company's long-term liabilities and obligations totalled NOK 26.7 million (NOK 79.5 million). The group's share of current assets and liabilities in ship owning companies totalled NOK 88.9 million and NOK 851.1 million respectively.

Net cash flow from operating activities was NOK 17.2 million, compared to an operating profit of NOK 101.5 million. The main difference comes from the reversal of earnings from shipping companies using the equity method, partially offset by changes in working capital.

The group's book equity totalled NOK 849.8 million (NOK 626.1 million) at the year-end.

4.3 Taxes

The group is from 2013 part of the tonnage-tax regime through its subsidiary Clipper Shipping AS. Other companies within the group are taxed ordinary.

All the company's current interests in ships except for one, are owned under the tonnage-tax regime.

4.4 Financial risk

The group's interests in ships that are owned through participation in general partnerships with shared liability, are primarily USD-based. Most of the revenues and the majority of

expenses are in USD. Furthermore, the market value of the ships, and thus the greatest share of the assets, is priced in USD. The same applies to the financing of the ships. This entails that the real foreign currency exposure is limited in financial terms.

The group's entire fleet is financed by long-term financing at favourable terms compared with what can be achieved in the market today. The group has not entered into any contracts concerning financial derivatives or other financial instruments where there is any particular counterparty risk.

Most of the group's liabilities consist of a share of the mortgage debt for ships that are owned through general partnerships. This is denominated in USD and priced at a floating LIBOR interest rate. In addition, mortgage debt in certain general partnerships is hedged through fixed interest rate contracts. The group has a satisfactory debt-equity ratio, and this, together with active management of the interest rate exposure, ensures that the risk associated with any change in interest rate levels is acceptable.

The group's fleet is employed in a mix of long & short TC contracts as well as in the spot market. This is a result of a conscious strategy aimed at ensuring earnings and cash flow, while at the same time benefiting from upturns in the market. The development of the world economy makes future market prospects uncertain.

The group has 13 ships on TC contracts in excess of one year. The charterers are oil majors and major operators within the Ammonia market. Credit risk is considered to be limited. The company sees the settlement risk for the business carried out in the spot market as satisfactory.

4.5 General

The year-end accounts are based on the assumption of a going concern. In the opinion of the Board of Directors, the accounts provide a true picture of the results for the year and the company's position at the year-end.

The group's interests in ships are owned through participation in general partnerships, with shared liability. In Note 3 of the accounts, the income statement and balance sheet have been compiled according to the proportionate consolidation method in order to provide more detailed accounting information on the operations.

All of the group's interests in ships are significant and they are recognised in accordance with IFRS based on the equity method of accounting.

5. ORGANISATION, HEALTH SAFETY AND THE ENVIRONMENT

5.1 Organisation

Both at sea and onshore, the company's primary focus is to ensure continuity on the personnel side. The company strives to establish an interesting and attractive workplace that attracts competent employees, where appraisals and employee surveys are key measures. We believe that we have succeeded in this context and that we have a stable and highly –qualified workforce.

Of the company's office staff, 38% are women and 62% are men. Women and men have equal opportunities to qualify for all types of jobs and positions, and they have equal opportunities for promotion. Working conditions are deemed to be good. Salaries reflect the individual's qualifications, regardless of gender.

Solvang is an international company with employees from a number of countries and cultures in addition to Norway. This recruitment policy is important for the future development of the company. The company wants to attract competent employees, regardless of religion, gender, race or sexual orientation.

The company engages in research and development work to optimise the ships' operations and to reduce emissions.

5.2 Health

The group has 42 onshore employees and

around 500 sailing personnel. Working conditions on shore and on the ships are considered to be good. Sick leave on board the ships were 0.95%. The group had no incidents that resulted in sick leave or lost time in 2014, and have only had 3 incidents causing lost time over the last 7 years. The target is always zero accidents, and the very low injury frequency can be attributes to a conscious attention on this area across the entire group.

Sick leave among the onshore employees was 1.41% in 2014. Of this percentage, 0,91% were from three long-term sick leave cases. The self-certified absence was at 1,95%. There were no incidents resulting in personal injury at the office in 2014.

5.3 Board of Directors

The Board of Directors consists of two women and three men. There is a healthy and positive working relationship between the management and Board of Directors.

5.4 Compensation policy

By offering a complete range of jobs, salaries and other benefits, Solvang aims to be an attractive employer for skilled individuals in all relevant disciplines.

All of Solvang's employees, including the Managing Director, are employed at a fixed salary with no fixed bonus or option elements. Salaries are adjusted once a year. The Managing Director's salary is evaluated correspondingly by the Board once a year. The company has a pension scheme that covers around 66% of the employees' salary with full entitlement based on 30 years of service and a retirement age of 67 for employees who started with the company before 31 December 2010. Persons who were employed after this date are offered a defined contribution scheme. In addition, the company has an ordinary insurance scheme covering disability, accidents and death.

The Board is remunerated by fixed directors' fees that are determined annually by the General Meeting. Board members have no bonus or

options agreements with the company.

5.5 External environment

The transport of LPG and petrochemical gases by sea entails little risk of emissions or leakage into the sea. Loading and unloading operations are conducted in closed systems, and strict quality and safety requirements reduce the risk of emissions to a minimum.

All transport at sea entails emissions to the air from the combustion of oil by the ships' main and auxiliary engines. Our policy in this area is thus to reduce such emissions as much as practically possible. The group focuses primarily on reducing the consumption of bunkers and lubricants, and has through active measures been able to continue the positive trend achieved in recent years. The modern ships today use up to 40% less fuel compared to ships of same size 20 years ago.

Measurements are carried out regularly using a number of systems. Fuel consumption measured against the distance travelled is one of the most important key figures. Wherever possible, we optimise our speed, in other words the speed that gives the lowest emissions and consumption given the contractual obligations we have towards our customers. These systematic analyses have generated excellent results in only a short timeframe. Our modern fleet is also significantly more environmentally friendly than older ships.

In 2010, the company was certified and approved in accordance with the ISO 14001 environmental standards, and will continue in its work to comply with the standard in future.

5.6 Safety

The company has strict quality and safety requirements, both on board the ships and within the onshore organisation. This is reflected in very good statistics for Loss Time Incident (LTI) injuries, with zero incidents in 2014 and only three incidents in the entire period from 2008-2014, with around 3.5 million working hours per year. This is further demonstrated in

our good insurance statistics. In order to ensure that this positive development continues, the company invests significant resources in programmes for the continuous improvement of quality and safety on board and on land. We conduct regular and systematic inspections of our ships as part of this work. The same applies to several of our customers, which includes several major oil companies. There were a total of 258 inspections on our 18 ships in 2014. Of these inspections, 125 were conducted by Solvang, while our customers, port authorities and classification companies conducted a total of 133 inspections.

The company uses the "Best Management Practice" in waters as appropriate according to the situation.

5.7 Corporate Social Responsibility

The group's main contribution to society is to conductlong-term, sustainable and value-added business for our shareholders, employees, customers, suppliers and other relations. Our goal is to ensure that our business practices and investments are sustainable and contribute to long-term economic, environmental and social development. The group's material sustainability areas are within Environment, Finance, Human Resources and Community, including ethics and anti-corruption

The Group recognizes its environmental responsibility and strive to maintain a high standard in order to reduce the environmental impact of its operations. The company has focused on reducing fuel consumption, which is the main source of the shipping sector's emissions of CO2, NOx and SOx. Continuous measurements of all consumption are being done, as well as implementing measures and setting clear targets for improvement. The Group also has two VLGCs which were the first in the world of its kind with full exhaust cleaning system, have done a complete retrofit of one of the ethylene carriers with the same exhaust gas cleaning equipment, and all the three newbuilds for delivery in 2015 will have full scale exhaust gas cleaning installed.

With regards to Finances, the company strives for good corporate governance with necessary internal controls, risk management, and solidity.

It is the company's policy to integrate attention to human and labour rights in its existing business. In practice, a large part of human and labour rights are covered by the company's health and safety work. The company values its employees as its most important resource, and always aim to continuously provide and promote high quality of working conditions, both on land and on board ships.

The company believes that corruption hinders well-functioning business processes and suppresses economic development. The group focuses on transparency in its business practices, and compete in a fair and ethical manner. The Board of Solvang ASA has approved a Code of Conduct, a set of ethical guidelines that define the company's ethical standards. The Group is furthermore a full member of MACN (Marine Anti-Corruption Network), a network of companies doing knowledge sharing and working actively to reduce corruption in the most exposed areas.

6. CORPORATE GOVERNANCE

Solvang attaches importance to good corporate governance. There is a good relationship between the owners, Board and management, and all three parties have a desire and a stated goal to comply with any significant requirements stipulated by the Corporate Governance Code.

6.1 General

Solvang shall conduct operations that are commercially sound and beneficial to the owners, employees, customers and suppliers. The operations shall be conducted in accordance with clear ethical guidelines and with a focus on the impact on the environment and society as a whole.

6.2 Operations

The operations are described in the company's articles of association as being shipping, shipowning operations and real estate. The company is currently concentrating entirely on

shipowning operations and shipping.

6.3 Company capital and dividends

Shipping is a cyclical industry that requires the company to be adequately capitalised with regard to equity and liquidity. This is reflected in the company's balance sheet structure. The company aims to have a stable and predictable dividend policy. This means that the dividends shall reflect the profit for the year, but dividends have also been paid during years with less earnings. In recent years dividends have been based on striking a balance between these two considerations. It is proposed a dividend of NOK 1.00 per share for 2014.

6.4 Equal treatment of shareholders and transactions with related parties

The Company has only one class of share, with the same voting right for all shares. Transactions with related parties take place in accordance with the guidelines set by the code.

The group's main broker for sale and purchase is Inge Steensland AS. There are also parallel investments with companies controlled by the Steensland family. All transactions are carried out on market terms.

The Board of Directors has been granted a power of attorney by the General Meeting to increase the share capital by a maximum of 4 million shares. This power of attorney is valid for 12 months and has not yet been utilised.

The board has also been granted a power of attorney to approve the distribution of dividends on the basis of the financial statements for 2013. The power of attorney is valid until the Annual General Meeting in 2015, and has not been used.

6.5 Free negotiability

The shares are freely negotiable, and Board approval is not required for the acquisition of shares.

6.6 General Meeting

The General Meeting is called and held in accordance with the company's articles of association. The Auditor and Chairman of the

Board attend the General Meeting. Ample time shall be allowed for holding the General Meeting and for discussion.

6.7 Nominating Committee

More than 65% of the share capital is represented by the company's Board of Directors. It is therefore not deemed necessary to establish a separate nominating committee.

6.8 Board of Directors, composition and independence

The Board plays an important role as a link and as a control function between the shareholders and the company's management. The board members are elected for a term of one year at a time. The General Meeting also elects the Chairman of the Board. The Board also acts as the audit committee.

Some of the board members have shares in the company. These are shares that have been acquired at market price. The Board is remunerated through a fixed directors' fee.

The Board's composition reflects the ownership structure and the need for a broad range of expertise in shipping, finance, and HSE. The Chairman, Michael Steensland Brun, was employed in the company as Managing Director prior to the appointment as Chairman of the Board.

6.9 Work of the Board

The work of the Board and its meeting schedule is established once a year for the next 12-month period. The meetings include regular reporting and discussion in all relevant areas, including safety, quality, technical operations and finance. At least once a year, the company's Auditor participates in a board meeting at which feedback is given on the company's internal control, among other things.

6.10 Risk management and internal control

An important element in the company's risk management and internal control is an open and systematic dialogue between the Board and the management. A detailed review of the company's financial and operational position is carried out by the Board before presenting any quarterly report.

In general, there is a good dialogue between the Board and the management. No changes to the business plan or significant investments are made without prior discussion and approval by the Board.

6.11 Remuneration of the Board

The principles for remuneration of the Board and the management have remained unchanged for a long period of time. None of the Board's members have any additional duties for the company. The Board has not been allocated options in the company.

6.12 Remuneration of executive management

The company's senior executives are employed on a fixed salary. No options or fixed bonuses are linked to salary agreements. Details of the remuneration of the Board and senior executives are given in Note 10 to the consolidated accounts and Note 8 to the annual accounts for Solvang ASA. For several years, the company has had a programme for the sale of shares to employees, most recently at the start of 2015. Each employee has had an opportunity to purchase shares worth up to a maximum of NOK 30,000 at a 20% discount.

6.13 Information and communication

The company attaches great importance to ensuring that all shareholders and the market in general receive accurate and detailed information simultaneously and at the right time. The reports are published and distributed relatively soon after the end of each quarter and year. The company will only publish the annual report and quarterly reports on the Internet.

6.14 Corporate takeovers

As mentioned in Section 6.5, the company's shares are freely negotiable. In the event of a bid for the company, the Board will strive to provide

the company's shareholders with accurate and timely information, as well as adequate time to evaluate the bid. If the situation so requires, the Board will seek an independent valuation to assess the value of the bid submitted.

6.15 Auditor

Each year, the Auditor presents a plan for the auditing work and reports the results of the audit that has been conducted. The Board summons the Auditor to board meetings at which significant accounting matters are to be discussed. This normally occurs once or twice a year. Information on the Auditor's remuneration, broken down by auditing and other work, is presented in the company's annual report and submitted to the General Meeting for approval.

One meeting is held each year between the Auditor and the Board without the presence of the management.

7. FUTURE OUTLOOK

From January 2014 the Group's ethylene fleet was free from previous contractual obligation in the Middle East, and was now better positioned to take both European and USA cargoes in addition to the Middle East. This resulted in a small increase in 2014, and after a slow start in 2015, with low export volumes from all areas, it is expected that the long haul ethylene market is back from second quarter and throughout the year.

For the fully refrigerated ships (VLGC and LGC), the 2014 market was at a historical high. 2015 has started in the same trend, and is expected to be a very strong year, with additional increased in export volumes from USA as well as stable export levels from Middle East. For the largest ships, VLGC, the orderbook is more than 50% of the global existing fleet, and there is some uncertainty about the longer term supply and demand balance within this segment.

The Group had at year-end contract coverage of 94% for 2015 for the fully refrigerated ships (VLGC & LGC), with only one ship coming available in June 2015 and one of the newbuilds

is currently without firm contract. The ethylene tonnage operates mainly in the spot market and on consecutive voyage contracts.

8. ALLOCATION OF THE PARENT COMPANY'S PROFIT

Solvang ASA posted a result of KNOK 9 148.

The Board of Directors proposes the following allocation:

Suggested dividend KNOK -24 451 From other equity: KNOK 15 303

At the year-end, the parent company's equity amounted to KNOK 542 732 (KNOK 564 591).

9. SUBSEQUENT EVENTS

During first quarter 2015, the Group increased its ownership in Clipper Star DA by 2%, Clipper Sky DA by 3% and Clipper Victory DIS by 1.53%. The first of three LGC newbuilds, Clipper Jupiter, was delivered from the shipyard in Korea the 8th of April. There are no other subsequent events of material concern.

10. CONCLUSION

The Board of Directors and the management would like to thank all the employees, both at sea and on shore, for their fine efforts during a busy period, where the Group delivers strong results in terms of safety, quality and financial. We would also like to thank our customers and suppliers for their good support and cooperation in 2014 and look forward to the same good cooperation in 2015.

Notes 2014 | Solvang Group

NOTE 1 - CORPORATE INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

CORPORATE INFORMATION

Solvang ASA is a public limited company incorporated and domiciled in Norway whose shares are publicly traded on Oslo Børs. The company was incorporated in 1936, and the address of the registered office is: Solvang ASA, Næringslivets Hus, Haakon VII's gate 8, 4005 Stavanger, Norway.

Solvang ASA and its subsidiaries' ("Solvang" or "the Company") business is fully concentrated on shipping and ship owning activities through investments in shipping partnerships. The investments in shipping partnerships are accounted for using the equity method.

As of 31.12, Solvang's fleet consists of 17 ships that carry liquid petrochemical gases, liquefied petroleum gases and ammonia.

BASIS OF PRESENTATION

The consolidated financial statements have been prepared on a historical cost basis, except for investments in shares and other financial instruments, which are valued at market value according to IAS 39, and ownership in ship owning companies which are valued according to equity method of accounting.

The consolidated financial statements are presented in Norwegian kroner (NOK).

Statement of Compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards adopted by the EU-adopted and appurtenant interpretations and additional country-specific disclosure requirements according to the Norwegian Accounting Act and stock exchange rules, in effect as of 31st of December 2014.

The proposed consolidated financial statement was approved by the board of directors and the managing director on the date which appears on the dated and signed balance sheet. The consolidated financial statement will be handled by the annual general meeting on 12 May 2015 for final approval. Until final approval, the board is authorised to amend the consolidated financial statement.

Basis of consolidation

The consolidated financial statements of Solvang ASA comprise the financial statements of Solvang ASA and its subsidiaries. As of 31

December 2014, Solvang ASA has four fully-owned subsidiaries: Solvang Shipping AS, Clipper Shipping AS, Solvang Maritime AS, and International Gas Carriers AS. Solvang Shipping AS has been liquidated in January 2015

Consistent accounting policies are applied throughout the group.

All intercompany balances, transactions, income and expenses together with unrealized profits and losses resulting from intercompany transactions that are recognized in assets, have been eliminated.

Functional Currency

The functional currency of an entity is the currency of the primary economic environment in which the entity operates. Normally, that is the currency of the environment in which an entity primarily generates and expends cash. The Company has Norwegian kroner as the reporting currency at group level. Both Solvang ASA and its fully-owned subsidiaries Solvang Shipping AS, Clipper Shipping AS and Solvang Maritime AS have Norwegian kroner as their functional currency. However, International Gas Carriers ASA and investments in ship owning companies accounted for using the equity method, have US dollar (USD) as the functional currency. Exchange differences arising on translation of the ship owning companies from USD to NOK is recognized as a separate item in shareholders' equity, net of any deferred tax.

SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

Estimation uncertainty

The preparation of consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported revenues and expenses during the reporting periods. The most significant estimates and

assumptions relate to fixed asset impairment tests and pension liabilities. We evaluate these estimates on an ongoing basis, utilizing past experience, consultations with experts and other methods we consider reasonable in the particular circumstances. Nevertheless, actual results may differ significantly from our estimates.

The key assumptions concerning the future and other key sources of estimating uncertainty at the balance sheet date and which have a significant risk of material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

Impairment of tangible fixed asset

The company invests in ships through shipping partnerships. For ships held in entities accounted for using the equity method, the Company assesses at each reporting date whether there is an indication that an asset that is held in entities accounted for using the equity method may be impaired. If any such indication exists, the Company makes an estimate of the asset's recoverable amount, which is the higher of fair value less costs to sell or value in use.

All tangible fixed assets are evaluated for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable. This requires an estimation of the asset's value, which, if available, is based on market appraisals or value in use.

The value in use is determined on the basis of the total estimated discounted future cash flows, excluding taxes. In determining impairment of fixed assets, management must make judgments and estimates to determine the cash flows generated by those assets. Discount rates must also be estimated. Assumptions used in these estimates are consistent with internal forecasts. To support management's estimates, market outlook and considerations provided by the joint/venture chartering companies have been used.

If the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. The impairment is reflected through the Company's share of income/(loss) from ship owning companies in the profit and loss account.

The Company considers whether there is a basis for reversing previous asset impairment write-downs, using the same evaluation criteria as for impairment. If the review suggests that there is a basis for reversal, the carrying amount is reversed to the estimated fair value, limited to the carrying amount the asset would have had if no impairment had been recognized.

SIGNIFICANT ACCOUNTING POLICIES

Revenue and expense recognition

The Company's revenues are mainly derived from ship management. These revenues are fixed per year according to contracts and recognized monthly throughout the year. Operating expenses are expensed when incurred.

Income in shipping partnerships booked using the equity method, are either income from joint ventures or income from time charters. Freight income and demurrage are recognized according to monthly joint venture settlements and monthly time charters. Direct voyage expenses are matched to income when relevant. Essentially, all direct voyage expenses for the joint ventures and time charter are recognized on the accounts of the charterers.

Foreign currency transactions

Transactions in foreign currencies are recorded using the exchange rate at the transaction date. Balances denominated in foreign currencies are translated using the exchange rates at the balance sheet date. Foreign currency gains and losses are recorded as financial items when incurred.

Investments in shipping partnerships – equity method

The equity method is used for investments in limited partnerships and shipping partnerships in which the Company has significant influence. The Company's share of profits and losses are adjusted to include amortization of excess value on ships if the original cost of the owner interest is higher than the acquired share of booked equity.

Tangible fixed assets

Tangible fixed assets are stated at cost, less accumulated depreciation and impairment write-downs. Depreciation is straight-line over the estimated useful life of the asset. When assets are sold or retired, their costs and related accumulated depreciation are removed from the balance sheet and any gain or loss is included in net income. Estimates of useful life, residual value and method of depreciation are reviewed at each financial year end and adjusted if appropriate. Any changes are accounted for prospectively as a change in accounting estimate.

Tangible fixed assets in shipping partnerships

In the shipping partnerships booked using the equity method, the ships are booked at cost less accumulated depreciation and impairment write-downs. Cost includes the expense of adding/replacing part of a ship, machinery or equipment when that expense is incurred if the recognition criteria are met. The carrying amount of those parts that are replaced is derecognized.

Depreciation of ships is computed using the straight line method over estimated useful life. The depreciable amount is determined after deducting the residual value of the asset. The cost of ships has been categorized separately by its main components, and useful life has been determined for each component. The average useful life for gas ships is 30 years.

A part of the original cost of ships is allocated to periodical maintenance. Periodical maintenance for ships is recognized in the balance sheet and expensed over the period up to the next periodical maintenance. Current maintenance is expensed as incurred.

When assets are sold or retired, their costs and related accumulated depreciation are removed from the balance sheet and any gain or loss is included in net income.

Estimates of useful life, residual values and methods of depreciation are reviewed at each financial year end and adjusted if appropriate. Any changes are accounted for prospectively as a change in accounting estimate. The estimated useful life of the ships could change, resulting in different depreciation amounts in the future.

Financial assets

Financial assets are recognized on the contract date, when the group becomes party to the contractual provisions of the instrument. Initially, all financial assets which are not recognized at fair value through profit or loss are recognized in the balance sheet at fair value including transaction costs. Financial assets which are recognized at fair value through profit or loss are recognized at the time of acquisition at fair value and the transactions costs are recognized.

The group derecognizes a financial asset when the contractual right to the cash flow from the asset expires or when the group transfers the contractual right to a transaction where substantially all the risks and rewards of ownership of the financial asset are transferred. All rights and obligations that are created or retained in this type of transfer are recognized separately as assets or liabilities.

As a rule, the group classifies financial assets in one of the following categories: financial assets at fair value through profit or loss; loans and receivables; and financial assets available for sale.

Financial assets at fair value through profit or loss

A financial asset is classified at fair value through profit or loss if on initial recognition it is designated as such or is classified as held for trading. Financial assets are designated at fair value through profit or loss if management and acquisition and sales decisions are based on the instrument's fair value in accordance with the group's documented risk management or investment strategy. On initial recognition, attributable transaction costs are recognized in profit or loss when incurred. Instruments are measured at fair value, and changes in value are recognized in profit or loss.

Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables are initially recognized at fair value plus directly attributable transaction costs. After initial recognition, loans and receivables are measured at amortized cost using the effective interest method, less any impairment loss.

Held for sale

Financial assets held for sale is non-derivative financial assets which we choose to classify in this category, or which do not belong to any other category. They are classified as assets as long as the investment does not fall due within twelve months or the management has as intention to sell the investment within twelve months from the balance sheet date.

Offsetting

Financial assets and obligations are presented net if the group has a legally enforceable right to set off the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Financial liabilities

Financial liabilities are recognized on the

contract date, when the group becomes party to the contractual provisions of the instrument. On initial recognition, non-derivative financial liabilities are recognized at fair value plus directly attributable transaction costs. After initial recognition, liabilities are measured at amortized costs using the effective interest method.

Share capital

Ordinary shares are classified as equity. Costs that are directly attributable to the issuance of ordinary shares and share options are recognized as a reduction of equity (share premium reserves) net after any tax.

When shares which is recognized as equity is reacquired, the consideration, including directly attributable costs, is recognized as a reduction in equity, net after tax. The shares that are acquired are classified as treasury shares, and are presented separately. The shares' face value is separated, and deducted from the share capital. When treasury shares are sold, the amount received is recognized as an increase in equity and divided between share capital and other equity. Gain or loss as a consequence of the transaction is transferred to/ from retained earnings.

Impairment of financial assets

At the balance sheet date (reporting date), financial assets that are not measured at fair value with value changes recognized in profit or loss are measured to determine whether there is objective evidence of impairment. A financial asset is assessed to be exposed to impairment if objective evidence exists that one or more events have had a negative effect on the estimated future cash flow for the asset. Objective evidence that financial assets have been subjected to impairment may be: failure of the debtor to make payments; changes in outstanding claims at terms which the group would otherwise not have accepted; indications that a debtor or issuer will become bankrupt or the lack of an active market for securities. For equity instruments classified as available for sale, there will be

objective evidence of impairment due to a significant or prolonged decline in the fair value below its cost.

Basic and diluted earnings per share

Basic earnings per share are computed by dividing profit for the year by the weighted average number of common shares outstanding during the period. On a diluted basis, both profit for the year and shares outstanding are adjusted to assume exercise of all potential shares which have been outstanding in the period. For diluted earnings per share, the Company must also consider the potential outstanding shares of its equity method investees. Neither the Company nor its equity method investees has any potentially outstanding shares. The difference between basic earnings per share and diluted earnings per share is a consequence of treasury shares.

Pensions

The company has both a defined benefit pension plan and a contribution based pension plan whereas the benefit pension plan was closed for new employees per 01.01.2011. All employees starting from 2011 will be included in the contribution based pension plan.

Defined benefit pension plan

The Company has a defined benefit pension plan for employees, managed and funded through a Norwegian life insurance company, and non-funded pension obligations for two pensioners, which are not covered by the general pension plan. The present value of benefit obligations is calculated based on actuarial methods, and compared with the value of pension assets. The net amount of the present value of benefit obligations and pension assets, adjusted for unrecognized changes in estimates, is included under longterm liabilities or non-current assets. Net pension costs (benefits earned during the period including interest on the projected benefit obligation, less estimated return on pension assets and amortization of accumulated changes in estimates) are

included in salaries and other personnel expenses.

Gains and losses resulting from the remeasurements of the pension liability based on experience variances and changes in actuarial assumptions are recognized in equity through other comprehensive income in the period they occur..

Contribution based pension plan

For contribution based pension plans, the company pays contributions to a public or private managed pension plan. The company has no further payment obligations after the contribution have been paid. Contributions are recognized as personnel expenses in line with the obligation to pay contributions accrue.

Taxes

Income tax expense consists of taxes payable and the net change in deferred taxes arising as a result of temporary differences.

Current tax for the current and prior periods is measured at the amount expected to be paid to the tax authorities for present and earlier years. The tax rates and tax laws used to compute the amount are those that are enacted by the balance sheet date.

Change deferred taxes reflect the future tax effects resulting from the activities for the period. Deferred taxes in the balance sheet are calculated on the basis of temporary differences between financial and taxable values, with consideration for taxable losses carried forward. The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that is not probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. Unrecognized deferred tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered. Deferred tax assets and

liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event and where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Dividends

Dividends proposed by the Board of Directors are not recorded as liability in the financial statements until they have been approved by the shareholders at the annual general meeting.

Related parties

Parties are related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also related if they are subject to common control or common significant influence. The Company believes that all transactions between related parties are based on the principle of arm's length (estimated market value).

Business areas/segments

Ship management and ship ownership are the business areas for Solvang. Ship ownership is further divided based on type and size of ship. Solvang has ownership interests in gas ships. These ships are divided into three types based on size, semi-ref ships from 12,000 – 17,000 cbm, LGC ships from 40,000 - 60,000 cbm and VLGC ships above 75,000 cbm. Accounting information based on business area and ship types are given in note 3 to the accounts.

Cash flow statement / Cash and cash equivalents

The Company uses the indirect method for calculating cash flow statements. Cash flows generated by investment and financing activities is shown gross, while for operations a reconciliation is shown between profit for the year and cash flows from operating activities. Cash and cash equivalents include cash and bank deposits.

NEW IFRS AND IFRIC INTERPRETATIONS

The following standards have been adopted by the group for the first time for the financial year beginning on or after 1 January 2014 and have a material impact on the group:

Amendments to IAS 32 - Financial Instruments. The amendment clarifies when net presentation of financial assets and liabilities can be undertaken, and it also considers settlement mechanisms. The change did not have any significant impact on the consolidated financial statements.

IFRS 10 - Consolidation. Regulates when a company has control and must consolidate the investment. The implementation did not have any effect on the consolidated financial statements.

IFRS 11 - Joint arrangements. Regulates how investments in joint arrangements should be accounted for based on a new classification model. The implementation did not have any effect on the consolidated financial statements.

IFRS 12 - Disclosures. Regulates the disclosures to be provided for investments in subsidiaries, joint arrangements, associates and unconsolidated investments. The implementation did not have any significant effect on the consolidated financial statements.

IFRIC 21 - Levies. Provides guidance for accounting of an obligation to pay levies that falls within the scope of IAS 37 - Provisions. The interpretation addresses what the triggering event is, which means when the levy should be recognized as a liability. The implementation resulted in no significant changes in the timing of recognition of levies for the group.

There are no other new or changed IFRSs or IFRIC interpretations that are effective for the 2014 financial statements, which is considered to have or expected to have a material impact on the Group.

New standards and interpretations which have not come into force

There are a number of new standards and interpretations that have been adopted but not yet made effective for the year ending 31 December 2014. For example

- IFRS 9 Financial Instruments will replace IAS 39
- IFRS 12 (Amendment) Disclosures of Interest in Other Entities
- IFRS 15 Revenue from contracts with customers
- IAS 19 (Amendment) Employee benefits

The Group has not used early adoption of any new or amended IFRSs and IFRIC interpretations, and based on the information known to Solvang ASA at the reporting date (when the financial statements are prepared) it has been determined that these will most likely not have a material effect on the consolidated accounts for Solvang ASA in 2014.

When it comes to changes in accounting rules for financial instruments, IFRS 9 was adopted in late 2009. Implementation of IFRS 9 is postponed indefinitely. It is not yet approved for use by the EU and Solvang ASA will consider adopting this standard early when it has been approved for use. If this becomes relevant, Solvang will demonstrate the possible consequences.

NOTE 2 - FINANCIAL MARKET RISK

The group is exposed to credit risk, liquidity risk and market risk by use of financial instruments.

Credit risk

Credit risk is risk for financial loss if a counterpart to a financial instrument does not manage to fulfil its obligations under the contract. There are attached credit risk to the group's receivables. Receivables are mainly towards affiliated ship owning companies included using the equity method of accounting. As manager for these companies, we have a good view of their financial standing, and the credit risk is considered minimal.

Liquidity risk

Liquidity risk is the risk for the group not being able to fulfil its financial obligations as they fall due. Shipping is a cyclical business, and the group has therefore chosen to be well capitalized, and have a high proportion of liquidity. As of 31.12.2014 the liquidity reserves amount to 10 % of the total balance sheet, while current liabilities together with liability to pay equity to affiliated companies amount to 11 % of the balance sheet. The liquidity risk is considered acceptable.

Market risk

Market risk is risk for changes in market prices, such as exchange rates on currency, interest rates and share prices, influence on income or value of financial instruments. There is attached financial market risk to bank deposits (exchange rate), loans (exchange rate and interest rates). In addition the group is exposed to market risk related to mortgage loans in the ship owning companies included using the equity method of accounting (interest rates). The group has a conservative strategy for investment in equity shares. The groups activities are mainly USD based, and deposits are to a large extent held in USD to reduce exchange rate risk. The group is mainly exposed to interest rate risk through mortgage loan in the ship owning companies. These loans are priced at floating LIBOR rate + margin. Interest rate exposure is actively handled, and parts of the loans are secured by fixed interest rate contracts to reduce interest rate risk. Due to a conservative strategy regarding financial instruments, and active handling of market risk, we are of the opinion that the groups market risk is satisfactory seen in relation to the balance sheet.

Asset management

The board's goal is to keep a sufficient capital base, to maintain confidence from investors, creditors and the market in general, and to develop the business activity. The Board considers any investments in financial instruments continuously. The Group currently has no investments in financial instruments with the exception of treasury shares. Capital return is monitored by the board. The group trade in its own shares. The purpose is to increase value for the company's shareholders. There has not been made any changes in how asset management is approached during the year. None of the group's companies is subordinated external capital requirements.

FINANCIAL INSTRUMENTS	31.12.2014		31.12.2013	
	Booked value	Fair value (Level 1)	Booked value	Fair value (Level 1)
Financial assets held at fair value through profit or loss				_
Equity securities	0	0	13 811	13 811
Options	0	0	0	0
Loan and receivables				
Long term loans	0	0	0	0
Total	0	0	13 811	13 811

The table above analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

For bank deposits, receivables and account payable the groups best estimate as per 31.12. is that book value is equal to fair value.

NOTE 2 - FINANCIAL MARKET RISK

SENSITIVITY ANALYSIS

accounting

Change in exchange rates		Value change
Bank deposits	10 % increase of exchange rates	7 332
	10 % reduction of exchange rates	-7 332

Change of interest rates Effect on profit or loss

Mortgage loans on ships in companies included using the equity method of

of 100 basis points increase of interest rates 8 245 100 basis points reduction of interest rates -8 245

Effect of change of interest rates for bank deposits is evaluated insignificant, and there is not made a sensitivity analysis.

NOTE 3 - AREAS OF OPERATION

Solvangs management reports and control are reported according to the proportionate consolidation method. In the companys view this gives the best information regarding total risk related to the groups operation. The main reason for using this principle is that the majority of the ship owning companies are organized as pro rata unlimited partnerships where each partners has an unlimited, pro rata liability for the ship owning companys commitments. In the notes to the accounts the profit and loss account as well as the balance sheet are presented according to the proportionate consolidation method. Further, main figures for areas of operation for our ship owning activity are presented with a split on market segments by ship size and ship management activities.

Where the company has invested in pro rata unlimited partnerships (Partrederi DA), the company has a pro rata liability for the ship owning company's commitments. The ownership in the ship owning companies have been tested for impairment by comparing the carrying values against valuations obtained from brokers. There are indications of impairment for several of the vessels. Estimated value of use are calculated for the vessels that have an indication of impairment. The recoverable amount is fixed at estimated value of use of each ship. Estimated value of use is calculated as a net present value based on the rest of life and risk. The net present value is calculated based on each vessel's remaining economic life, and the first year's cash-flow based on approved budgets. Discount rate, 4.4% (5 year) and 4.9% (10 year), is based on the group's risk weighted cost of capital (WACC). WACC is calculated on basis of the capital asset pricing model (CAPM), and the loan interest rate is assumed interest rate for new loans. USD/NOK is set at 7.4299, which was the rate as per 31.12.2014.

Mortgage debt in ship owning companies are nominated in USD and priced by LIBOR + margin. For parts of the debt interest rate SWAPS has been entered for maturities up to 5 years.

NOTE 11 - PENSION COST AND PENSION LIABILITIES

Funded plans

The group has a general pension plans in a life insurance company. The plan entitles its members to defined future benefits. These benefits are mainly dependent on number of years of employment, salary at the end of ordinary employment and the size of the benefits from the National Insurance Scheme. Full retirement pension will amount to approximately 66% of the basis for pension (limited to 12G), and the plan also includes entitlement to disability and children's pensions. Retirement age is 67 years. The company has the right to alter the pension plan. The benefits accruing under the scheme are funded. The pension plan has 29 members. The defined benefit pension plan for Solvang ASA has been closed for new employees. New employees are members of a defined-contribution pension plan.

This pension plan together with the defined contribution pension plan meets the requirement in the Act on Mandatory company pension.

Non-funded plans

The group also has non-funded pension obligations for 2 pensioners, and for the Managing Directors of IGC and Solvang, which are not covered by the general pension plan. The pension obligations for the Managing Director include early retirement pension and pension for salary exceeding 12 G.

Assumptions

Company contributions

Administrative expenses

Pensions paid during the year

Fair value of plan assets at December 31

Pension liabilities and pension costs are calculated by a third party independent actuary, and are valued according to Revised IAS 19. Changes in pension liabilities due to actuarial assumptions and differences between actual and expected return on plan a assets are recognized in other comprehensive income. The following Assumptions were used:

	2014	2013		
Discount rate	2,30 %	4,00 %		
Expected salary increases	2,75 %	3,75 %		
Rate of pension increases	0,00 %	0,60 %

Composition of plan assets on major investment categories

The company's pension funds are managed by an independent life insurance company that invests the funds of the plan according to Norwegian law. The major categories of plan assets as a percentage of the fair value of plan assets are as follows:

	2014	2013
Shares and other equity instruments	10,80 %	13,30 %
Bonds	62,00 %	45,30 %
Money market and similar	10,00 %	25,80 %
Properties and real estate	15,00 %	15,60 %
Other	2,20 %	0,00 %
Total	100,00 %	100,00 %

Expected payments related to the pension plans in 2015

The Group's estimate contribution to the funded pension plan for the fiscal year 2015 is NOK 3 561 731.

The Company's estimated payments for non-funded pension plans are NOK 745 910 for the fiscal year 2015.

The value adjusted return on plan assets (secured pension plan) was 5% per 31.12.2014, and for 2013 the value adjusted return was 5,5%.

Sensitivity

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

		Impact on defined benefit obli	igation
	Change in assumption	Increase in assumption	Decrease in assumption
	0.50.0/		
Discount rate	0,50 %	Decrease 10 %	Increase 12 %
Salary growth rate	0,50 %	Increase 6 %	Decrease 5 %
Changes in pension from the Norwegian National Insurance	0,50 %	Decrease 1 %	Increase 1 %
Pension growth rate	0,50 %	Increase 7 %	Decrease 0 %

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated.

Defined-contribution pension plan

The defined benefit pension plan for Solvang ASA has been closed for new employees. New employees are members of a defined-contribution pension plan. Per 31.12.2014 this plan had 15 members. Paid contributions in 2014 was NOK 643 845.

Pension liability from subsidiary, Solvang Maritime AS

Solvang Maritime's pension liabilities are charged to the shipping companies and therefore represents no cost to the Group. A receivable towards the shipping companies matching the pension liability is therefore recognized in the balance sheet making the net pension liability zero out. Pension obligations from Solvang Maritime is thus not included in the figures above.

NOTE 12 - RELATED PARTIES

The shipping companies where Solvang has an ownership share of more than 20% and companies where the Steensland family have control are regarded as related parties. All transactions with related parties, are at arm's length and market terms. In connection with Solvang's position as manager for the shipping partnerships, there are ongoing transactions between Solvang and the individual shipping partnerships. Solvang receives a yearly fee as managers. The size of the fee is regulated by the management agreement, and is approved each year by the annual general meeting of the shipping partnerships. Solvang's regular broker for sale and purchase is Inge Steensland AS. Parallel investments with other companies controlled by the Steensland family, are also made.

NOTE 1 ACCOUNTING PRINCIPLES

The annual accounts consist of the profit and loss account, balance sheet, cash flow statement and notes to the accounts, and have been presented in compliance with the Norwegian Companies Act, the Norwegian Accounting Act and Norwegian generally accepted accounting principles in effect as of 31st of December 2014.

The annual accounts have been prepared based on the fundamental accounting principles and the classification of assets and liabilities are according to the Norwegian Accounting Act. The application of the accounting principles and the presentation of transactions and other issues attach importance to economic realities, not only legal form. Contingent losses, which are likely to happen and are quantifiable, will be expensed.

General principles

Assets that are meant for long-term ownership or use are classified as fixed assets. Other assets are classified as current assets. Receivables are classified as current assets if they are to be repaid within one year after payment. The same criteria apply for liabilities.

The annual accounts have been prepared based on the fundamental accounting principles historical cost, comparability, going concern, congruence and prudence. Transactions are recorded at their value at the time of the transaction. Income is recognised at the time of delivery of goods or service sold and matches costs expensed in the same period as the income to which they relate is recognized.

Valuation of fixed assets is entered in the accounts at original cost. If the fair value of a fixed asset is lower than book value, and the decline in value is not temporary, the fixed asset

will be written down to fair value. Fixed assets with a limited expected useful life is depreciated according to plan.

Current assets are valued at the lower of acquisition cost and fair value. Short-term liability is booked nominally at the point of establishment.

According to the accounting principles there are some exceptions from the general principles. These exceptions are commented below.

Fixed assets

Fixed assets are entered in the accounts at original cost, with deductions for accumulated depreciation and write-down. If the fair value of a fixed asset is lower than book value, and the decline in value is not temporary, the fixed asset will be written down to fair value. Depreciation is calculated and distributed linearly over the estimated useful life. Maintenance of fixed assets is continuously booked to operating cost. Major replacement and improvements witch significantly improve the fixed assets useful life, are added to the purchase price of the assets.

Investment in subsidiaries

By subsidiaries means investments where the company directly or indirectly owns more than 50% of the voting shares, where the investment have a long-term and strategic dimension, and investments where the company have a controlling interest. Investments in subsidiaries are accounted for using the purchase method. Cost price increases when means are contributed by a capital increase, or when group contribution is received by the subsidiary. Received dividends are normally booked as income. Dividends which exceeds retained earnings after the initial investment, is booked as reduction of historical acquisition cost.

NOTE 1 ACCOUNTING PRINCIPLES (cont)

Year-end allocation related to dividend from subsidiaries is entered as financial income the same fiscal year.

Investment in affiliated companies

By affiliated companies means investments where the company directly or indirectly owns 20-50% of the voting shares, where the investment have a long-term and strategic dimension, and investments where the company can exercise a considerable influence. Investments in affiliated companies are accounted for using the equity method.

Solvang's share of the profit in an affiliated company is based on profit after tax in the affiliated company less any depreciation on excess value due to the acquisition cost of the owner interest being higher than the acquired share of book equity. In the profit and loss account, the share of the profit in affiliated companies is presented as financial items. In the balance sheet, owner interests in affiliated companies are presented together with fixed assets.

For affiliated participant taxed companies are Solvang's share of the profit based on the pretax profit in the affiliated company. Tax on profit share is recognized through the general tax cost of the Group.

Receivables

Receivables are valuated at face value after deduction of accrual for anticipated loss. Accruals for anticipated loss are made on basis of assessment of the individual outstanding claims.

Foreign currency

Transactions in foreign currencies are recorded at transaction date.

All cash and bank balances in foreign currency are accounted for at the exchange rate at year-end.

Financial expenses

When a new debt financing is established any up-front fees and other cost related to the financing are expensed at the date of drawdown of the loan.

Pension liability and pension cost

The Company has both defined benefit and contribution based pension plans, which the defined benefit pension plan was closed by 01.01.2011 so that all new employees starting from 2011 will be included in the contribution based pension plan.

Defined benefit pension plan

Net pension cost includes the period calculated pension benefits, including expected salary increases, estimated interest expenses, less the expected return on plan assets and any effects of changes in estimates and plans. The surplus is capitalized to the extent it can be applied to future pension obligations. The company applies Revised IAS 19 Employee Benefits as a basis for accounting for pension.

Contribution based pension plan

For defined contribution plans the company pays contributions to publicly or privately administered pension insurance plans. The company has no further payment obligations once the contributions have been paid. Contributions are recognized as compensation expense in line with the obligation to pay contributions accrue.

Treasury shares

Own shares are posted at face value on a separate line of the balance sheet under equity.

NOTE 1 ACCOUNTING PRINCIPLES (cont)

The difference between the face value of the share and the original cost is deducted from other equity.

Taxes

Taxes in the Profit and Loss statement contain both payable tax of the year and changes in deferred tax / deferred tax asset.

Deferred tax /deferred tax assets are calculated on basis of temporary differences between accounting standards and tax legislation by the end of the fiscal year. The calculation is based on nominal tax rate. Tax-augmenting and tax-reducing temporary differences that can be reversed in the same period are balanced in the accounts. Deferred tax assets arise if there are net tax-reducing temporary differences which can be justified by the assumption of future profits. This year tax on ordinary result consist of net changes in deferred tax and deferred tax assets together with payable tax of the year and adjusted for any differences in provision previous years.

Cash flow statement

The Cash Flow statement is prepared in accordance with the indirect method. Cash flow generated by investing and financing activities is shown gross, while for operations reconciliation is shown between book profit and cash flow from operating activities. Investments in securities are not included under cash equivalents. Cash and cash-equivalents include petty cash and bank payments.

Managing Director has an agreement of one year pay after termination of employment, and an additional contribution based pension of 15% of salary above 12G. The company's senior executives are employed on a fixed salary. No share-based payments or fixed bonuses are related to the salary agreements. The Company has not granted loans or guarantees to any of its employees.

All employees got paid a bonus in 2014 equal to one months salary. Total bonus of 2014 amounted to NOK 2 126 053,-.

The fee to the auditors for 2014 amounts to NOK 365 410, whereof NOK 357 220 relates to audit regulated by law and NOK 8 190 for tax advisory. The amounts are reported exclusive of VAT.

NOTE 9 - PENSION COST AND PENSION LIABILITIES

Funded plans

The company is obligated to have a pension plan according to the Act on Mandatory company pension, and has a pension plan which follows the requirement as set in the Act on Mandatory company pension.

The company has a general pension plan in a life insurance company. The plan entitles its members to defined future benefits. These benefits are mainly dependent on number of years of employment, salary at the end of ordinary employment and the size of the benefits from the National Insurance Scheme. Full retirement pension will amount to approximately 66% of the basis for pension (limited to 12G), and the plan also includes entitlement to disability and children's pensions. Retirement age is 67 years. The company has the right to alter the pension plan. The benefits accruing under the scheme are funded. The pension plan has 22 members (2013: 24 members).

Non-funded plans

The company also has non-funded pension obligations for 2 pensioners and an additional defined contribution plan for CEO, which are not covered by the general pension plan.

Assumptions

Pension liabilities and pension costs are calculated by a third party independent actuary, and has been evaluated according to revised IAS 19. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited through Equity. The following assumptions were used:

	2014	2013
Discount rate	2,30 %	4,00 %
Expected salary increases	2,75 %	3,75 %
Rate of pension increases	0,00 %	0,60 %
Increase of National Insurance Basic amount (G)	2,50 %	3,50 %
Expected return on plan assets	2,30 %	4,00 %
Social Security Tax	14,10 %	14,10 %

The board of directors and CEO own or control shares in the company as of 31.12.2014 as follows:

Michael Steensland Brun (Chairman)

Wenche Rettedal

Edvin Endresen (CEO)

981 201

4 401

Proposed dividend

The Board of Directors has proposed a dividend of NOK 1.00 per share for 2014. A dividend of NOK 0.50 per share was paid for 2013.

Allocated dividend is based on the number of shares outstanding on the grant date.

The company has no other dividend limitations than those imposed by Norwegian law.

NOTE 18 - TREASURY SHARES

As of 31.12.2014 Solvang ASA had shareholdings of 249 259 treasury sahares, booked at NOK 1 426 306. The purpose for buy back of own shares was to increase value for the company's shareholders.

NOTE 19 - FINANCIAL MARKET RISK

The company's operations expose the company for currency risk and interest risk, whilst the company only have a very limited exposure to credit risk and market risk.

CURRENCY RISK AND INTEREST RISK

Investment in ship owning companies

The operations of the company's investments in ship owning companies accounted for according to the equity method are mainly USD based. Most of the revenues are in USD. The majority of the income is in USD. Furthermore, the market value of the ships, and thus most of the assets, are priced in USD. Most of the debts are also in USD. This leads to foreign exchange exposure being limited.

Most of the company's debt is share of the debt in the ship owning companies accounted for according to the equity method. This is denominated in USD and is priced by floating LIBOR interest. All loans are at floating interest rates. The company has an acceptable equity ratio. This together with an active handling of interest rate exposure, leads to the risk of any changes in the interest rate level being limited for the company.

NOTE 20 - SHARES IN OTHER COMPANIES

	2014		2013	
	Acquisition cost (NOK)	Book value/ Market value (NOK)	Acquisition cost (NOK)	Book value/ Market value (NOK)

Currency exchange rate USD/NOK as of 31.12.2014

7,4299

The company has sold all records in the securities portfolio in 2014. This gave a profit of NOK 2.4 mill. (Ref Note 4).

STATEMENT OF COMPLIANCE

BOARD AND GENERAL MANAGER'S STATEMENT OF COMPLIANCE

We confirm that the annual accounts for the period 1 January 2014 to 31 December 2014 are, to the best of our knowledge, presented in compliance with current applicable accounting standards, and that the information contained in the accounts give a true and fair view of the company's and the groups' assets, liabilities, financial position and results as a whole. We also confirm that the information in the annual report gives a true summary of the developments, profits and losses and position of the company and the group together with a description of the most central risk factors and uncertainties with which the company is faced.

Independent auditor's report

Report on the Financial Statements

We have audited the accompanying financial statements of Solvang ASA, which comprise the financial statements of the parent company and the financial statements of the group. The financial statements of the parent company comprise the balance sheet as at 31 December 2014, and the income statement, statement of changes in equity and cash flow statement, for the year then ended, and a summary of significant accounting policies and other explanatory information. The financial statements of the group comprise the balance sheet at 31 December 2014, income statement, statement of comprehensive income, changes in equity and cash flow for the year then ended, and a summary of significant accounting policies and other explanatory information.

The Board of Directors and the Managing Director's Responsibility for the Financial Statements

The Board of Directors and the Managing Director are responsible for the preparation and fair presentation of the financial statements of the parent company in accordance with Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and for the preparation and fair presentation of the financial statements of the group in accordance with International Financial Reporting Standards as adopted by EU and for such internal control as the Board of Directors and the Managing Director determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, including International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independent auditor's report - 2014 - Solvang ASA, page 2

Opinion on the financial statements of the parent company

In our opinion, the financial statements of the parent company are prepared in accordance with the law and regulations and present fairly, in all material respects, the financial position for Solvang ASA as at 31 December 2014, and its financial performance and its cash flows for the year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway.

Opinion on the financial statements of the group

In our opinion, the financial statements of the group are prepared in accordance with the law and regulations and present fairly, in all material respects, the financial position of the group Solvang ASA as at 31 December 2014, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by EU.

Report on Other Legal and Regulatory Requirements

Opinion on the Board of Directors' report and the statements on Corporate Governance and Corporate Social Responsibility

Based on our audit of the financial statements as described above, it is our opinion that the information presented in the Board of Directors report and in the statements on Corporate Governance and Corporate Social Responsibility concerning the financial statements, the going concern assumption and the proposal for the allocation of the profit is consistent with the financial statements and complies with the law and regulations.

Opinion on Registration and Documentation

Based on our audit of the financial statements as described above, and control procedures we have considered necessary in accordance with the International Standard on Assurance Engagements ISAE 3000 "Assurance Engagements Other than Audits or Reviews of Historical Financial Information", it is our opinion that management has fulfilled its duty to produce a proper and clearly set out registration and documentation of the company's accounting information in accordance with the law and bookkeeping standards and practices generally accepted in Norway.
