## Solvang Supplier Code of Conduct

### INTRODUCTION

As a supporter of the principles in the UN Global Compact, member of Maritime Anti-Corruption Network and ISO 14001-2015 certified, Solvang ASA adheres to high ethical and environmental standards in the way we conduct business. Solvang ASA acknowledge these standards being observed by suppliers to the company. However, Solvang ASA operates in many countries with diverse cultures and economies. The suppliers are diverse and provide a wide range of goods and services.

In this Supplier Code of Conduct “suppliers” refer to contractors as well as suppliers of goods and services. All suppliers to Solvang ASA are expected to operate in accordance with this or any comparable Supplier Code of Conduct (‘SCC’). Where suppliers breach the SCC, Solvang ASA will try to establish a close co-operation in order to assist the supplier in improving the business standards and employee welfare. However, if the supplier continues to deliberately breach the SCC, and is unwilling to discuss and agree upon a planned improvement, Solvang ASA reserves itself the right to terminate arrangements with the supplier immediately.

The SCC is a mandatory requirement and may be subject to occasional audits. In order to achieve this Solvang ASA expects its suppliers to adopt an open attitude to the monitoring activities that will be implemented and to give all cooperation to its own and any third party auditors employed.

To ensure a socially responsible shipping industry worldwide, it is the expectation of Manager that suppliers adhere to all relevant laws, rules and regulations, and strive to improve their practices where necessary. Improvements also involve making certain their individual suppliers adhere to the same standards and legal requirements. The SCC should also be communicated to employees and subcontractors of suppliers in the local language, where required, in a manner that is understood by all.

Solvang ASA acknowledges that reaching the standards established in this SCC is a dynamic rather than static process and encourages suppliers to continually improve their standards in areas required.

Solvang ASA expects that its suppliers will establish and maintain appropriate management systems whose scope is related to the content of this SCC, and that they actively review, monitor and modify their management processes and business operations to ensure they align with the principles set forth in this SCC.

All principles contained in this SCC are of equal importance independently of their order of appearance.
